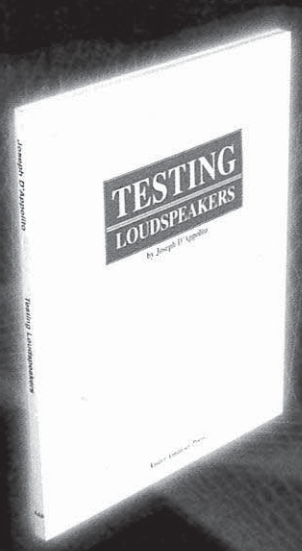
The book on loudspeaker testing from MTM inventor, Joseph D'Appolito!



Learn to test your loudspeakers with this great tutorial. More than simply a "how-to," the book uses specific examples to demonstrate the principles involved. The final two chapters provide a highly readable explanation of the theories needed to understand PC-based electrical and acoustical data-acquisition and analysis systems. Examples of measurements made using MLSSA and CLIO are included. A must-have book for experienced hobbyists, speaker designers, and technicians. 1998, 176pp., 8½" x 11", softbound, ISBN 1-882580-17-6. Sh. wt: 2 lbs.
