SoundBridge® HomeMusic

Wireless Music Player

Easily Add Wireless Music to Your Home

Product Overview

Pinnacle SoundBridge HomeMusic™ brings your PC and Mac digital music files to your home audio system—with no wiring required. The SoundBridge HomeMusic supports a large variety of standard and premium audio file formats giving you best in class price performance. Moreover, it's future proof thanks to 100% support of Windows Media DRM and WEP encryption. It also lets you listen to Internet radio stations and play music directly from SD cards.

Positioning

Pinnacle SoundBridge HomeMusic is an affordable wireless music player that's easy to install and use. It's aimed at cost-conscious buyers who want a wireless music player that's compatible with all the ripped and DRM music in their music library. They also want to listen to Internet radio and music files stored on an SD card.

Target Market

Pinnacle SoundBridge HomeMusic is aimed at people who want to enjoy their computer-based digital music files on their stereo or powered speakers located in another room. SoundBridge also provides a convenient way to browse and select tracks from large collections of music files.

A growing target market is people who purchase and download music or podcasts from the Internet, and who listen to Internet radio. These users tend to be young. Their priority is instant-on access to this kind of online media; they don't want a product that is complicated to install and configure.

Features

- **Music Anywhere** - Connects to a stereo system or powered speakers to play digital music from your Mac or PC via your Wi-Fi home network. Offers WEP 64/128 support
- **Works with iTunes®¹ and Windows®² Media Connect** - Plays directly from Windows Media Connect.
- **Fully Plug-and-Play** - Works with PC and Mac. Compatible with 802.11b and 802.11g wireless networks.
- **Most Compatible Player** - In addition to standard music formats (MP3, WMA, etc.), supports online music services such as Napster™, MSN® Music, and many more.
- **Internet Radio** - Listen to thousands of free radio stations even when your computer is off.³

- **SD/MMC card slot** - Allows for offline playback of downloaded music from your PC and mobile devices⁴.
- **Headphone jack** - Listen without disturbing others.
- **Convenient Remote** - Browse, select and control your music from across the room using the remote control, even in playback mode.
- **Fits in any room** - Small enough to sit on a bookshelf, kitchen counter or bedside table.

¹ Cannot play protected AAC files purchased from the iTunes Music Store.

² Windows XP Service Pack 2 required

³ When Pinnacle SoundBridge HomeMusic is connected to a router with Internet connection.

⁴ Digital rights-managed files cannot be played from the SD/MMC card.
