## WG148-464

Our DCX464 dual-diaphragm coaxial compression driver is the engine driving tomorrow's loudspeaker arrays. To direct that power to the furthest seats, we now offer the ME148 waveguide: B&C's first vertical array waveguide optimized for the extra octaves present in our coaxial compression drivers. Precise vertical control from below 500Hz to beyond 18kHz, with user-defined horizontal control, depending on the appropriate expansion flare.

*made in Italy*
