

COMPANY STATEMENT

(Reference JVM410 Heater fuse removal)

Units affected

Products produced before or during manufacturing week 24 of 2007 (serial number on product states the week of manufacture number ex.: M-2007-**24**-1234-1).

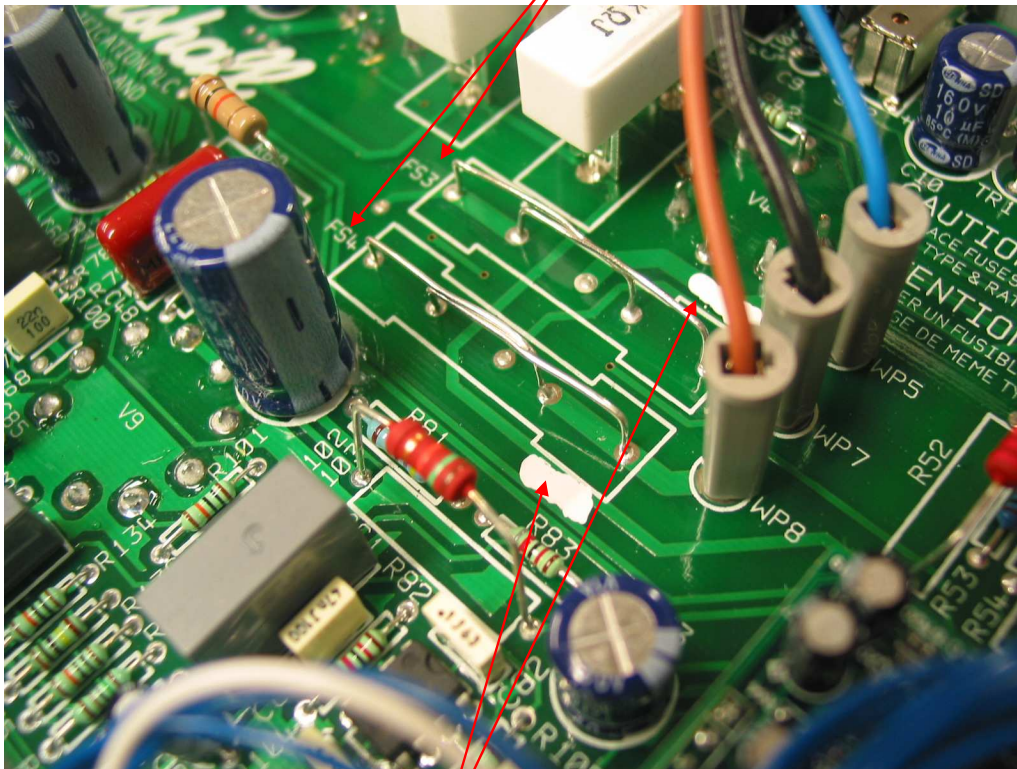

Affected PCB 's will be marked as PCBP-00129-**01 / 02 / 03 / 04**

NOTE:

PCB 's marked as PCBP-00129-**05** will already be modified by Marshall Amplification plc and so require no action.

Action to take

1. Remove fuses and fuse holders from location FS3 & FS4 on PCB and replace with 2 wire links per fuse soldered in positions shown below using WIRE-20045. 21swg Tinned link preformed to 26.5mm long and 5mm high.

2. Cover fuse ratings of FS3 & FS4 (T10A) marked on PCB silk screen with TIPP-EX.
