Desoldering wick for leadfree solder joints

Leadfree soldering is again a challenge to everybody. Nearly everything is possible, but you have to take care about exact parameters. Sometimes you have to use other materials, to assure a solid base for the working with lead-free solder.

EDSYN offers you a new desoldering wick, which is especially designed for the lead-free area. With a new alloy the lead-free solder wet fast the copper braid.

Technical Data

- with flux
- without halogens
- flux according to F-SW 32
- copper with a special lead-free alloy
- no cleaning of flux residues necessary
- size of spools: 1,5m or 30m/15m
- width: 1,5mm, 2,0mm, 2,5mm, 3,0mm
